SyncSlide VIDEO TO PRESENTATION From recording to review-ready deck SyncSlide keeps each visual connected to the words spoken around it. Video · Transcript · Slides

Audio transcription

A useful presentation is more than a folder of screenshots. SyncSlide transforms a lecture, webinar, meeting, or screen recording into a sequence ready for review, keeping every distinct visual connected to the words spoken around it.

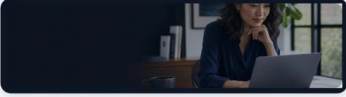

Slide 2 - 00:21

SyncSlide
REVIEW WITHOUT SCRUBBING

Stop scrubbing. Start reviewing.

The frame, timestamp, and transcript stay connected.

- The frame**
 See the exact visual selected from the recording.
- The timestamp**
 Jump to the moment without hunting the timeline.
- The context**
 Review OCR and spoken content beside the slide.

THE PROBLEM Stop scrubbing. Start reviewing. The frame, timestamp, and transcript stay connected. Recording timeline Selected scene Spoken context Ready to review

Audio transcription

Manual reviews break the context apart. You replay the timeline, hunt for a visual change, capture a frame, and reconstruct the explanation by hand. SyncSlide keeps the moment, the image, and its spoken context together.

Slide 3 - 00:45

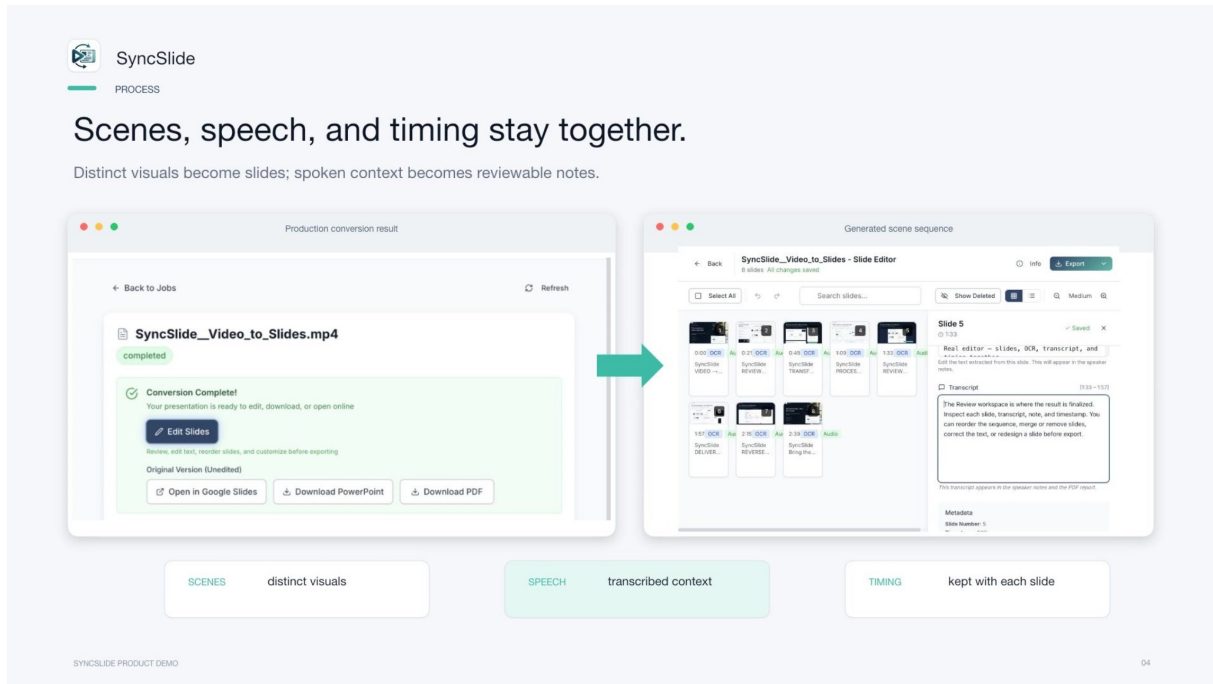

Text extracted from slides

TRANSFORM Upload once. Review before processing. Choose only what you need; the exact credit estimate appears before you start. Drop a video or browse Transcription On-screen text Transcript polish Exact estimate before processing Calculated live from the file and selected options

Audio transcription

Upload the recording and choose the processing features you need. Before anything starts, SyncSlide displays the exact credit estimate for that file and those options, allowing you to review the total before committing.

Slide 4 - 01:09

SyncSlide
PROCESS

Scenes, speech, and timing stay together.

Distinct visuals become slides; spoken context becomes reviewable notes.

PROCESS Scenes, speech, and timing stay together. Distinct visuals become slides; spoken context becomes reviewable notes. Visual scenes Spoken context Slide notes Scene 01 Scene 02 Scene 03 Transcript aligned Notes ready

Audio transcription

During processing, SyncSlide identifies distinct visual scenes, transcribes the speech, and aligns both on a single timeline. Each selected visual becomes a slide, while the relevant spoken context is converted into reviewable notes.

The Review Workspace is where results are finalized. Inspect each slide, transcript, note, and timestamp. Reorder the sequence, merge or remove slides, correct the text, or redesign a slide before export.

Slide 6 - 01:57

The screenshot displays the SyncSlide interface. At the top, it says "SyncSlide DELIVER". Below this, the main heading is "One reviewed sequence. Three delivery paths." followed by the subtext "PowerPoint and PDF downloads, with Google Slides sharing when available." The central part of the interface is a "Real SyncSlide export menu" titled "SyncSlide_Video_to_Slides - Slide Editor". It shows a grid of 8 slides with timestamps and labels like "OCR", "Audio", and "Transcript". A "Slide 5" panel on the right provides a "Real editor" with options to "Open in Google Slides", "Download PowerPoint", "Download PDF", "PowerPoint (.pptx)", and "PDF Download". It also includes a "Transcript" section with a sample text block and a "Metadata" section showing "Slide Number: 5". To the right of the editor, there are two preview cards: "POWERPOINT" showing a slide with a woman's video, and "PDF REPORT" showing a document cover.

DELIVER One reviewed sequence. Three delivery paths. PowerPoint and PDF downloads, with Google Slides sharing when available. Reviewed deck PowerPoint PDF Google Slides When available Same approved sequence

Audio transcription

Once the sequence is approved, download it as a PowerPoint or PDF. You can also send the deck to a connected Google Slides account for collaborative review.

Slide 7 - 02:15

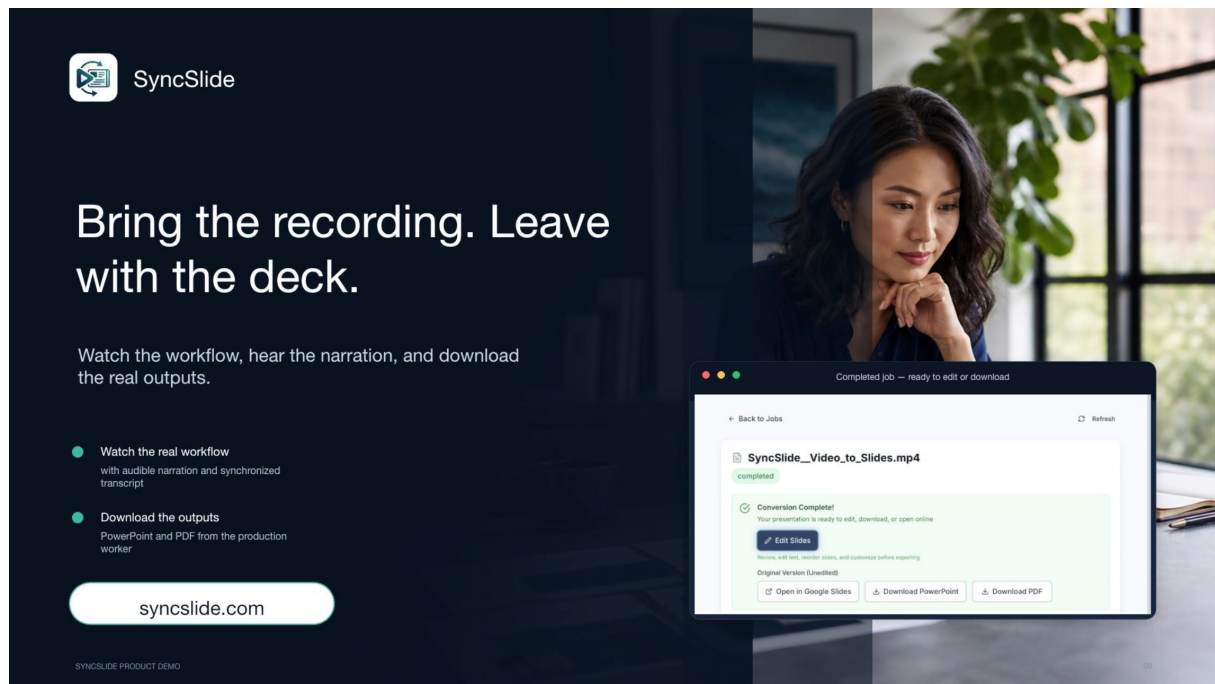

Text extracted from slides

REVERSE WORKFLOW Turn a deck back into narrated video. PowerPoint or PDF in. Review notes. Choose a voice. MP4 out. Presentation Slides and speaker notes Choose a voice Preview narration Review pacing Narrated MP4

Audio transcription

SyncSlide also works in reverse. Upload a PowerPoint or PDF to review the slides and their speaker notes. Choose a voice, preview the narration and pacing, and generate a shareable MP4 with working audio controls.

Slide 8 - 02:39

Text extracted from slides

SyncSlide Bring the recording. Leave with the deck. Watch the narrated demo Review the synchronized transcript Download PowerPoint Download PDF Review current account options syncslide.com

Audio transcription

Bring the recording you already have. Review the exact estimate before processing, follow the job from upload to completed slides, and download the result as a PowerPoint or PDF. Alternatively, bring an existing deck, review its speaker notes and voice, and create a narrated MP4. You can also view current account options on the SyncSlide website.
